Steel Protective Coil Spring

**Part No. 900564

(Refer to page 15)

Step 1

Follow the appropriate assembly instructions through the assembly of one end fitting. Insert one end fitting in vise.

Step 2

Cut coil length. Coil should be cut to overall assembly length "OA" minus the sum of the overall length of each end fitting. ("A" dimension).

Step 3

3a Steel Protective Coil Sleeve

The hose and the coil should be held straight. Taping or capping the hose end can prevent frayed wire ends from snagging on the coil. Bend one end to the coil outward to form a slight tab to assist grasping. (Cut off or bend back when installation is complete.) Hold the tab with the thumb of one hand while twisting the coil clockwise approximately one foot back from the coil tab. When the coil opens up sufficiently, slip the tab end to the coil over the hose. Move the coil onto the hose by pulling at the tab end while pushing with the other hand. Be careful not to exceed the resiliency of the coil by stretching it too far.

3b Steel Protective Coil Spring

Slide coil over hose.

Step 4

Proceed with assembly of second end fitting.

Step 1

Follow the appropriate hose assembly instructions through the assembly of both end fittings. Insert end fitting in vise.

Step 2

Cut coil length. Coil should be cut to overall assembly length "OA" minus the sum of the overall length of each end fitting. ("A" dimension).

Step 3

Wrap the coil on the hose.

Assembly Instructions

Hose with Sleeve

Bundling Sleeves

**Part No. FC676
A4900**

(Refer to page 10)

Assembly procedures

- 1.) Measure the length of bundling sleeve required and cut to length.
- 2.) Begin folding over the bottom portions of the sleeve material.
- 3.) Fold over one end of the hook & loop material and fasten to the bottom. Work your way up the entire length of sleeve this way.
- 4.) Your hoses are now secure and bundled.

Firesleeve

**Part No. 624
A6900**

(Refer to page 15)

Step 1

Follow the appropriate hose assembly instructions through the assembly of one end fitting. Cut firesleeve to same length as hose.

Start firesleeve over cut end of hose. **Note:** If applying sleeve over Teflon or stripped cover assemblies, wrap exposed wire with tape. Grasp sleeve and slip over the hose assembly as illustrated.

Step 2

Skin sleeve back from cut end of hose enough to allow assembly of second end fitting. (2A)

Then center sleeve so that it completely covers both sockets. (2B)

Step 3

Insert tail of band clamp into hand clamping tool.

Step 4

Position band clamp over sleeve as shown and then draw tight with hand tool. Remove tool and cut free end of band clamp. Repeat on other end of assembly. To complete, bend protruding tail of clamp over clamp buckle.

Hydraulic lines are subject to tremendous stress and wear in use. Lines that are allowed to move freely are easily abraded, crimped, or cut. But common methods for binding hydraulic lines, such as cable

ties, can restrict their movement too much as they expand and contract. We have the answer.

Our Bundling Sleeves hold lines securely in place to protect them from dam-

age, while providing enough flexibility for normal operation. The sleeves can be removed and replaced quickly, allowing easy access to individual hoses for repair.

Features

- Tight bundling and secure hose containment
- Choice of sizes and colors for visibility and aesthetics
- Resistant to heat, ozone, and abrasion
- Easy removal and replacement

Applications

- Case IH Patriot Sprayer SPX 4260 uses bundling sleeves to protect hydraulic and brake hoses
- Champion Road Machinery Sales uses bundling sleeves to protect hydraulic lines
- Rosco Manufacturing Company uses bundling sleeves on Model RA-200 Pothole Filler

Benefits

- Increases productivity in assembly and reassembly of hose bundles
- Reduces contamination of hoses during bundle assembly
- Forces routing of hydraulic lines for safety and efficiency
- Reduces risk of hose bursts, resulting in greater operator safety
- Reduces time spent on field repairs
- Replaces inefficient bundling methods and line-damaging cable ties
- Eliminates cumbersome winding of spiral formed products
- Reduces "old sock syndrome"—bunching at end of bundled lines
- Eliminates line contamination during hose replace-

PART NUMBER

FF13503

Contains:

Each Merchandising kit comes complete with a quantity of individually cellophane wrapped, bundling straps in both Cinch and Hanging Styles for bundling diameters of 8", 12", 16" & 20" sizes (note the box will be stocked with approximately 1/2 of the available strap capacity to allow for lower kit pricing at start-up.) Re-supply merchandiser kit, by ordering the individually wrapped part numbers in the charts above.

The box is constructed to have a pop-up lid that can be positioned upright as an effective advertising backdrop. The box is shipped in a corrugated shipping container to prevent damage to the merchandising box.

Attached to the merchandising box by a wire lanyard, is a strap that can be used for demonstration

Bundling Straps hold hoses, cables, pipes, tubes and other items securely in place. They can be removed, adjusted and put back in place easily. The straps are made with a special hook-and-loop fastener developed for industrial applications, the safety industry and the military.

Unlike cable ties, Bundling Straps allow hoses and tubes to expand and contract in changing conditions. Cable ties must be destroyed when they are removed, but Bundling Straps can be used again and again with no loss of strength. The hook-and-loop fasteners used in Bundling Straps have superi-

or shear strength and peel compared to those used in the garment industry.

Cinching Strap (CS Series) Bundling Straps are designed for economical service applications, such as hose and cable bundling. All joints are ultrasonic welded and tested.

Hanging Strap (HS Series) Bundling Straps are held in place by a 3/8" grommet. The straps can be mounted vertically or horizontally.

Both cinching and hanging straps are available in standard duty or heavy duty. Heavy duty Bundling Straps are designed for severe industrial applications, rein-

forced with ballistic Cordura® nylon and ultrasonic welded to 1-1/2" hook-and-loop material. All heavy duty hardware is nickel-plated steel.

All Bundling Straps are in stock and ready for immediate shipment. They are sold in packages of 5, and discounts are available for volume quantities of 50, 100, 250, 500, and 1,000. Call to ask about special sizes, materials, colors or configurations.
